

P.T. RAIL™ - Fold Down Wall Rail

CONTINUING PRODUCT EDUCATION SERIES

BENEFITS

- **Safety** - Provides secure support exactly where it is needed, on one or both sides of the toilet area.
- **Comfortable** - Unique side offset rail design prevents wrist strain when using lower rail.
- **Secure** - Unique wide wall mounting plate and precision machined pivot assembly results in a "rock solid" feel unlike any other wall rail. Will not rattle or feel loose even after many years of use.
- **Flexible** - Rail folds up when not needed to store out of the way, yet pulls down in an instant when needed.
- **Safety** - Smooth "fluid feel" pivot joint holds its position wherever you leave it, even half way up, it will not inadvertently fall down causing impact injuries.

FEATURES

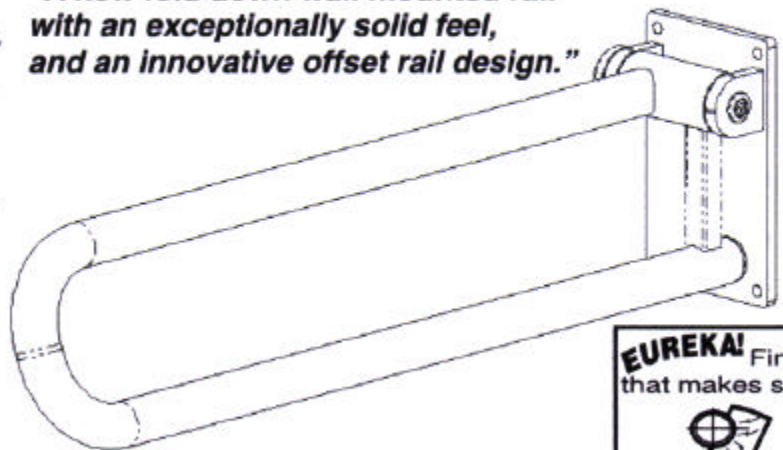

- Rail Length - 32" from wall to tip of rail
 - Rail Diameter - 1-1/2" (ADA Compliant)
 - Rail Offset - 6" vertical, 1-1/2" horizontal offsets
 - Rail Weight Capacity - 350 lbs user
 - Wall Plate - 6" x 9" with 4 fastener holes (3/8" dia.)
 - Construction - Alloy Steel, with white baked enamel
 - Pivot Joint - Fluid Feel pivot, tested to over 75 yrs daily usage
- *Also available: fixed rail model & floor mount mast adapter

GREAT FOR...

- **Hospitals** - Durable construction withstands frequent use.
- **Nursing Homes** - To lighten load on nursing staff & reduce risk of back strain injuries.
- **Clinics** - For teaching transfers & promoting independence.
- **Residential** - To assist with standing and transferring from/to the toilet.
