

The Smart Rail™

"An innovative bed assist rail designed for those requiring a little help for moving, standing, or transferring in and out of bed."

INNOVATIVE BREAKTHROUGH:
 Unlocks and swings out
 for better standing support.

BENEFITS

Independence - No more waiting for a helping hand! The Smart Rail reduces the need for caregiver assistance during transferring. With the Smart Rail you have the proper support where you need it, when you need it.

Reduce Injury Risk - The Smart Rail is more versatile than fixed bed rails. The Smart Rail moves with you to provide complete support when transferring in and out of bed, reducing the need to reach or twist.

Simple Installation - Simply slide the support frame between a standard box spring and mattress, secure with safety straps, and set the rail height.

Easy to Use - Rail unlocks and swings outward with a simple lift.

FEATURES

- **Highly Effective** - Pivoting feature allows the handle to be positioned where it can provide maximum support.
- **Security** - Rail locking feature provides excellent stability while moving in bed.
- **Flexible** - Rail is height adjustable in locked position to accommodate your specific needs. Optional "leg extenders" allow on ground rail height to adjust from 31 - 35".
- **Rugged & Reliable** - All steel construction protected with a durable baked on enamel finish will provide years of service.
- **Wider Support Zone** - Supports wider area for increased stability and multi-step transfers.

GREAT FOR...

The Smart Rail is great for persons who....

- Have difficulty sitting up or standing up from bed
- Transfer from bed to a wheelchair or walker
- Use a bedside commode
- Are subject to poor balance or falls
- Are recovering from an injury
